

IMPLANTOLOGY AND THIRD MOLAR EXTRACTIONS

A.Y. 2024/2025

CPD SECOND-LEVEL COURSE

AIM

This programme lasts one academic year, during which students will acquire both theoretical knowledge and practical skills. The Master's programme has a theoretical practical approach aimed at providing learning about the problems of surgical extraction and the subsequent phases of implant-prosthetic rehabilitation. Students will be involved in modern implantology, from diagnosis to prosthetic rehabilitation, and will have the opportunity to come into contact with the latest surgical techniques and technologies.

PARTNER
